# **SECTION 4: First aid measures**

· 4.1 Description of first aid measures

#### · General information

Symptoms of poisoning may even occur after several hours; therefore medical observation for at least 48 hours after the accident.

Personal protection for the First Aider.

It is possible to choke in case of vomiting in unconsciousness.

Bring unconscious persons into a stable position on side.

Keep the respiratory tract free (remove dentures and vomiting).

Check the pulse. In case of heart failure you have to make a cardiac massage. In case of stoppage of breathing: artificial respiration.

Take up a doctor immediately!

# After inhalation

Supply fresh air or oxygen; call for doctor.

Carry persons out of the dust-contaminated area.

- After skin contact After contact, clean the skin mechanical and rinse with water and soap.
- After eye contact Rinse opened eye for several minutes under running water. Then consult doctor. After swallowing

Do not give household remedys (milk, alcohol etc.) Avert vomiting.

(Contd. on page 3)

# Version number 1

Revision: 18.10.2022

# Trade name: THERMOPAL-ULTRA, white (Contd. of page 2) Drink copious amounts of water and provide fresh air. Instantly call for doctor. Show the packaging or the label to the doctor. · 4.2 Most important symptoms and effects, both acute and delayed No further relevant information available. · 4.3 Indication of any immediate medical attention and special treatment needed No further relevant information available. **SECTION 5: Firefighting measures** 5.1 Extinguishing media Suitable extinguishing agents CO2, extinguishing powder or water jet. Fight larger fires with water jet or alcohol-resistant foam. · For safety reasons unsuitable extinguishing agents Water with a full water jet. · 5.2 Special hazards arising from the substance or mixture The product formed corrosive water for fire-fighting. 5.3 Advice for firefighters · Protective equipment: Wear self-contained breathing apparatus. · Additional information Dispose of fire debris and contaminated fire fighting water in accordance with official regulations. Follow the emergency-plan. **SECTION 6: Accidental release measures** · 6.1 Personal precautions, protective equipment and emergency procedures Wear protective clothing. Avoid eye- and skin contact. Avoid causing dust. Bring persons out of danger. Wear protective equipment. Keep unprotected persons away. 6.2 Environmental precautions: Do not allow product to reach sewage system or water bodies. Inform respective authorities in case product reaches water or sewage system. The product may not leak out in sewerage system, stretch of water or soil. · 6.3 Methods and material for containment and cleaning up: Clean mechanically without dust. Ensure adequate ventilation. Pick up the product mechanically, avoid dust formation. 6.4 Reference to other sections See Section 7 for information on safe handling See Section 8 for information on personal protection equipment. See Section 13 for information on disposal. **SECTION 7: Handling and storage** · 7.1 Precautions for safe handling Prevent formation of dust. Keep away from children. · Information about protection against explosions and fires: No special measures required. · 7.2 Conditions for safe storage, including any incompatibilities · Storage

- Requirements to be met by storerooms and containers: Protect against wetness and water.
- Information about storage in one common storage facility:
- Please follow the rules of the VCI-Storage-Concept for chemicals.
- **Further information about storage conditions:** Protect from humidity and keep away from water.
- Do not store in restrooms or dining-rooms.

(Contd. on page 4)

GB

Safety data sheet according to 1907/2006/EC, Article 31

Printing date 18.10.2022

Version number 1

Revision: 18.10.2022

# Trade name: THERMOPAL-ULTRA, white

Keep container tightly sealed.

7.3 Specific end use(s) No further relevant information available.

# **SECTION 8: Exposure controls/personal protection**

· 8.1 Control parameters

• Additional information about design of technical systems:

It must be possible to wash the skin in the working area.

Eye-wash bottle must be available.

Components with critical values that require monitoring at the workplace:

# 65997-15-1 Cement, portland, chemicals (25-50%)

WEL Long-term value: 10\* 4\*\* mg/m<sup>3</sup> \*inhalable dust \*\*respirable dust

# 1305-62-0 calcium dihydroxide (2.5-10%)

WEL Short-term value: 4\* mg/m<sup>3</sup> Long-term value: 5 1\* mg/m<sup>3</sup> \*resprable fraction

• Additional information: The lists that were valid during the compilation were used as basis.

· 8.2 Exposure controls

Personal protective equipment

# · General protective and hygienic measures

The usual precautionary measures should be adhered to in handling the chemicals.

Keep away from foodstuffs, beverages and food.

Instantly remove any soiled and impregnated garments.

Vacuum clean contaminated clothing. Do not blow or brush off contamination.

Avoid contact with the skin.

Avoid contact with the eyes and skin.

Do not eat, drink or smoke while working.

Use skin protection cream for preventive skin protection.

Be sure to clean skin thoroughly after work and before breaks.

# · Breathing equipment:

Use respiratory protective equipment at formation of dust.

In case of brief exposure or low pollution use breathing filter apparatus. In case of intensive or longer exposure use breathing apparatus that is independent of circulating air.

• Protection of hands: Do not reuse one-way-gloves

# · Material of gloves

Mechanical protective glove with a coating of PVC or nitrile Suitable protective gloves have been determined for activities with products containing cement (GISCODES ZP1). Suitable are e.g:

Ampri: SolidSafety Cut 081101 / SolidSafety Tough 081201 / SolidSafetyTough Dots 081202 Ansell: Flexitril L27 / Fleximax 27 or 35 / Hylite / Nitrotough N210 / Sol-Knit KCL: Sahara / Gobi / Nitex

MAPA: Duo-Mix 405 / Enduro 328 / Stansolv AK 22 / Titanlite 397 / Titansuperlite UVEX: uvex Profi Ergo XG 20 / uvex phynomic pro

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

· Penetration time of glove material

The exact break trough time has to be found out by the manufacturer of the protective gloves and has to be observed.

• Eye protection: Tightly sealed safety glasses.

Body protection:

Use an Overall of heavy cotton or non-returnable Tyvek/Saranex 23 P vleece.

# **SECTION 10: Stability and reactivity**

· 10.1 Reactivity No further relevant information available.

- 10.2 Chemical stability
- Thermal decomposition / conditions to be avoided:
- No decomposition if used according to specifications.
- 10.3 Possibility of hazardous reactions No dangerous reactions known
- · 10.4 Conditions to avoid No further relevant information available.
- · 10.5 Incompatible materials: No further relevant information available.

(Contd. of page 5) • 10.6 Hazardous decomposition products: No dangerous decomposition products known

# **SECTION 11: Toxicological information**

#### 11.1 Information on toxicological effects

- · Acute toxicity Based on available data, the classification criteria are not met.
- · LD/LC50 values that are relevant for classification:

# 1305-62-0 calcium dihydroxide

| Oral   | LD50 | 7,340 mg/kg (rats)            |
|--------|------|-------------------------------|
| Dermal | LD50 | >2,500 mg/kg (Kan) (OECD 402) |

# 68475-76-3 Flue dust, portland cement

| Oral       | LD50       | >1,848 mg/kg (rats) (OECD 422) |
|------------|------------|--------------------------------|
| Dermal     | LD50       | >2,000 mg/kg (rats) (OECD 402) |
| Inhalative | e LC50/4 I | h >6.04 mg/l (rats) (OECD 436) |

- · Primary irritant effect:
- Skin corrosion/irritation
- The product has an irritate-effect. Causes skin irritation.
- · Serious eye damage/irritation
- Causes serious eye damage.
- Respiratory or skin sensitisation
- May cause an allergic skin reaction.
- Additional toxicological information:
- · CMR effects (carcinogenity, mutagenicity and toxicity for reproduction)
- · Germ cell mutagenicity Based on available data, the classification criteria are not met.
- · Carcinogenicity Based on available data, the classification criteria are not met.
- · Reproductive toxicity Based on available data, the classification criteria are not met.
- STOT-single exposure
- May cause respiratory irritation.
- STOT-repeated exposure Based on available data, the classification criteria are not met.
- · Aspiration hazard Based on available data, the classification criteria are not met.

# **SECTION 12: Ecological information**

- · 12.1 Toxicity
- Aquatic toxicity:

# 1305-62-0 calcium dihydroxide

# EC50 (48h) 49.1 mg/l (Daphnia magna)

- 12.2 Persistence and degradability No further relevant information available.
- · 12.3 Bioaccumulative potential No further relevant information available.
- 12.4 Mobility in soil No further relevant information available.
- · Additional ecological information:
- · General notes:

Water hazard class 1 (Self-assessment): slightly hazardous for water.

Do not allow undiluted product or large quantities of it to reach ground water, water bodies or sewage system.

Rinse off of bigger amounts into drains or the aquatic environment may lead to increased pH-values. A high pH-value harms aquatic organisms. In the dilution of the use-level the pH-value is considerably reduced, so that after the use of the product the aqueous waste, emptied into drains, is only low water-dangerous.

- 12.5 Results of PBT and vPvB assessment
- · PBT: Not applicable.
- **vPvB:** Not applicable.

· 12.6 Other adverse effects No further relevant information available.

(Contd. of page 6)

# **SECTION 13: Disposal considerations**

13.1 Waste treatment methods

· Recommendation

Must not be disposed of together with household garbage. Do not allow product to reach sewage system.

- · Uncleaned packagings:
- Recommendation: Disposal must be made according to official regulations.
- $\cdot$  Recommended cleaning agent: Water, if necessary with cleaning agent.

| SECTION 14: Transport information  |                       |

# **SECTION 15: Regulatory information**

- 15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture
- · Directive 2012/18/EU
- · Named dangerous substances ANNEX I None of the ingredients is listed.
- · 15.2 Chemical safety assessment: A Chemical Safety Assessment has not been carried out.

# **SECTION 16: Other information**

These data are based on our present knowledge. However, they shall not constitute a guarantee for any specific product features and shall not establish a legally valid contractual relationship.

# Relevant phrases

H302 Harmful if swallowed.

- H315 Causes skin irritation.
- H317 May cause an allergic skin reaction.
- H318 Causes serious eye damage.
- H335 May cause respiratory irritation.
