

## Product Declaration - LEED® v4 Building Design and Major Renovations

MANUFACTURER	SCHOMBURG GmbH & Co. KG
PRODUCT NAME	SANIFIN
PRODUCT CHARACTERISTICS	Waterproof membrane, Waterproofing beneath tiles in wet areas and wet rooms as well as commercial kitchens. Can be used on all wall and floor construction materials suitable for wet duty applications. For waterproofing surfaces that need to be tiled quickly. Technical approval for wet duty classifications A and C and for class A0 in accordance with the ZDB technical sheet "Bonded waterproof membranes". Very low emissions - GEV EMICODE EC1PLUS

SCHOMBURG GmbH & Co. KG  
 Aquafinstraße 2  
 32760 Detmold  
 Deutschland

### About LEED & Products - [www.usgbc.org](http://www.usgbc.org)

This declaration helps to assess products easily according to the certification system LEED® v4 Building Design and Major Renovations (excluded HEALTHCARE and SCHOOLS). Products are not reviewed or certified by LEED. LEED credit requirements cover the performance of materials in aggregate, not the performance of individual products or brands. For more information about LEED visit [www.usgbc.org/leed](http://www.usgbc.org/leed). The project team or the manufacturer is responsible to declare the compliance with the project requirements to achieve LEED points. Below you find an explanation of the symbols. Detailed information are on the next pages.

	Product helps to achieve the LEED point in the Credit		22%	X% of the product contributes toward satisfying the credit		Credit is not applicable to this product		Required data not specified - for required data contact manufacturer		Credit requirements are not fulfilled
--	---	--	-----	--	--	--	--	--	--	---------------------------------------

**MR Credit 1: Building Life-Cycle Impact Reductions (Option 4: LCA)**
**Intent**

To encourage adaptive reuse and optimize the environmental performance of products and materials.

**Requirement**

Environmental Product Declaration (EPD) can be used in Credit "MR 1: Building Life-Cycle Impact Reductions" in Option 4 "Whole-Building Life-Cycle Assessment" for the calculation of the Life-Cycle Assessment of the building. If no EPD existst, generic datasets will be used.

**Detailed Rating**

No.	General Information			Option 4:	Compliance
	Product name	Manufacturer	Mass [%]	Whole-Building Life-Cycle Assessment	
	SANIFIN	SCHOMBURG GmbH & Co. KG	100%	not specified	—
A1	SANIFIN	SCHOMBURG GmbH & Co. KG	100%	not specified	—

## MR Credit 2: BPDO - Environmental Product Declarations

### Intent

To encourage the use of products and materials for which life-cycle information is available and that have environmentally, economically, and socially preferable life-cycle impacts. To reward project teams for selecting products from manufacturers who have verified improved environmental life-cycle impacts.

### Requirement

Achieve one or more of the options below, for a maximum of 2 points.

#### Option 1: Environmental Product Declaration (1 Point)

Use at least 20 different permanently installed products sourced from at least five different manufacturers, for which an Environmental Product Declaration exist.

Proof - weighted value [%]:

- Product-specific declaration - 25 %
- Industry-wide (generic) EPD - 50 %
- Product-specific Type III EPD - 100 %

#### Option 2: Multi-Attribute Optimization (1 Point)

50 % of all materials (based on the material costs of the project) must be less than the industry average in terms of environmental emissions. Third party certified products that demonstrate impact reduction below industry average in at least three of the following categories are valued at 100 % of their cost for credit achievement calculations.

- global warming potential (greenhouse gases), in CO<sub>2</sub>e;
- depletion of the stratospheric ozone layer, in kg CFC-11;
- acidification of land and water sources, in moles H<sup>+</sup> or kg SO<sub>2</sub>;
- eutrophication, in kg nitrogen or kg phosphate;
- formation of tropospheric ozone, in kg NO<sub>x</sub> or kg ethene;
- and depletion of nonrenewable energy resources, in MJ.

Regional products (within 160 km = 100 Miles) are double-weighted.

### Detailed Rating

No.	General Information			Option 1: Environmental Product Declaration		Option 2: Multi-Attribute Optimization	
	Product name	Manufacturer	Mass [%]	EPD Program Operator	EPD Type - Weighted Value [%]	Third Party Certification Program **	Location *
	SANIFIN	SCHOMBURG GmbH & Co. KG	100%	not specified	not specified	not specified ***	see location
A1	SANIFIN	SCHOMBURG GmbH & Co. KG	100%	not specified	not specified	not specified ***	see location

\* see explanation "Location Valuation Factor" on page 10

\*\* Demonstrate impact reduction below industry average

\*\*\* Evidence is verified by: not specified

### MR Credit 3: BPDO - Sourcing of Raw Materials 1/2

#### Intent

To encourage the use of products and materials for which life cycle information is available and that have environmentally, economically, and socially preferable life cycle impacts. To reward project teams for selecting products verified to have been extracted or sourced in a responsible manner.

#### Requirement

Achieve one or more of the options below, for a maximum of 2 points.

##### Option 1: Raw Material Source and Extraction Reporting (1 Point)

Use at least 20 different permanently installed products sourced from at least five different manufacturers, who published a sustainability report of their suppliers.

- Manufacturer declared corporate sustainability report - 50 %
- Third-party verified corporate sustainability report (CSR) according to Global Reporting Initiative (GRI) Sustainability Report, Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises, U.N. Global Compact: Communication of Progress or ISO 26000: 2010 Guidance on Social Responsibility - 100 %

##### Option 2: Leadership Extraction Practices (1 Point)

25 % of all materials (based on the material costs of the project) must have at least an extended producer responsibility (closed loop or take back program) or are made from SAN certified bio-based materials, FSC certified wood, recycling materials (post-consumer recycled content plus one-half of the pre-consumer content), salvaged or reused materials.

#### Detailed Rating

No.	General Information			Option 1: Raw Material Source and Extraction Reporting
	Product name	Manufacturer	Mass [%]	Corporate Sustainability Report Type - Weighted Value [%]

\*\* SAN certified Content [%]

\*\*\* FSC certified Content [%]

\*\*\*\* Content of reused and salvaged materials [%]

## MR Credit 4: BPDO - Material Ingredients

### Intent

To encourage the use of products and materials for which life-cycle information is available and that have environmentally, economically, and socially preferable life-cycle impacts. To reward project teams for selecting products for which the chemical ingredients in the product are inventoried using an accepted methodology and for selecting products verified to minimize the use and generation of harmful substances. To reward raw material manufacturers who produce products verified to have improved life-cycle impacts.

### Requirement

Achieve one or more of the options below, for a maximum of 2 points.

#### Option 1: Material Ingredient Reporting (1 Point)

Use at least 20 different permanently installed products sourced from at least five different manufacturers, which published reports or data sheets with all ingredients.

Proofs (Weighted Value 100 %):

- Manufacturer Inventory
- Health Product Declaration (HPD)
- Cradle to Cradle (Cradle to Cradle v2 Basic or Cradle to Cradle v3 Bronze)

#### Option 2: Material Ingredient Optimization (1 Point)

25 % of all materials (based on the material costs of the project) must be certified by Green Screen, Cradle to Cradle or REACH.

- GreenScreen v1.2 List Translator - 100 %
- GreenScreen v1.2 Assessment - 150 %
- Cradle to Cradle v2 Gold - 100 %
- Cradle to Cradle v2 Platinum - 150 %
- Cradle to Cradle v3 Silver - 100 %
- Cradle to Cradle v3 Gold or Platinum - 150 %
- REACH - 100 %

#### Option 3: Product Manufacturer Supply Chain Optimization (1 Point)

25 % of all materials (based on the material costs of the project) are sourced from product manufacturers who engage in validated and robust safety, health, hazard, and risk programs and are sourced from product manufacturers with independent third party verification of their supply chain (e.g. ISO 14001 & OHSAS 18000).

### Detailed Rating

## EQ Credit 2: Low Emitting Materials 1/4

### Intent

To reduce concentrations of chemical contaminants that can damage air quality, human health, productivity, and the environment.

### Requirement

This credit includes requirements for product manufacturing as well as project teams. It covers volatile organic compound (VOC) emissions into indoor air and the VOC content of materials, as well as the testing methods by which indoor VOC emissions are determined. Different materials must meet different requirements to be considered compliant for this credit.

Category	Requirement
Interior paints and coatings applied on site	<ul style="list-style-type: none"> <li>• General Emissions Evaluation for paints and coatings applied to walls, floors, and ceilings</li> <li>• VOC content requirements for wet applied products</li> </ul>
Interior adhesives and sealants applied on site including flooring adhesive	<ul style="list-style-type: none"> <li>• General Emissions Evaluation</li> <li>• VOC content requirements for wet applied products</li> </ul>
Flooring	<ul style="list-style-type: none"> <li>• General Emissions Evaluation</li> </ul>
Composite wood	<ul style="list-style-type: none"> <li>• Composite Wood Evaluation</li> </ul> Proof: ultra-low-emitting formaldehyde (ULEF), no added formaldehyde resins (NAUF) or salvaged and reused wood
Ceilings, walls, thermal, and acoustic insulation	<ul style="list-style-type: none"> <li>• General Emissions Evaluation</li> </ul>
Furniture (include in calculations if part of scope of work)	<ul style="list-style-type: none"> <li>• Furniture Evaluation</li> </ul> Proof: ANSI/BIFMA e3-2011 §7.6.1, ANSI/BIFMA e3-2011 §7.6.2, CDPH Standard Method v1.1-2010 or salvaged or reused furniture

### Detailed Rating

No.	General Information			Option 1: Product Category Calculations	Option 2: Budget Calculation Method		Inherently Nonemitting

## Location Valuation Factor

### Information

Several credits in the MR section include a location valuation factor, which adds value to locally produced products and materials. The intent is to incentivize the purchase of products that support the local economy. Products and materials that are extracted, manufactured, and purchased within 100 miles (160 kilometers) of the project are valued at 200 % of their cost. For a product to qualify for the location valuation factor, it must meet two conditions: all extraction, manufacture, and purchase (including distribution) of the product and its materials must occur within that radius, and the product (or portion of an assembled product) must meet at least one of the sustainable criteria (e.g. FSC certification, recycled content) specified in the credit. Products and materials that do not meet the location criteria but do meet at least one of the sustainability criteria are valued 100 % of their cost (i.e. the valuation factor is 1).

The distance must be measured as the crow flies, not by actual travel distance. The point of purchase is considered the location of the purchase transaction. For online or other transactions that do not occur in person, the point of purchase is considered the location of product distribution.

### Detailed Rating

No.	General Information			Location		
	Product name	Manufacturer	Mass [%]	Extraction	Manufacture	Purchase (including distribution)
	SANIFIN	SCHOMBURG GmbH & Co. KG	100%	Double weighting depends on building site		
A1	SANIFIN	SCHOMBURG GmbH & Co. KG	100%	not specified	not specified	not specified
